

**What to do:**

Print this page out onto plain white computer paper, the heavier the better, and cut along the dotted lines to separate individual cards. Design your own detective logo and identity. If you don't have heavy computer paper handy, you can always use plain paper and paste the cards onto a piece of construction paper, cardboard, or cardstock.

**What to do with your cards:**

Hand these cards out to friends, family, or others you know who might be in need of your detective services. That way, they'll have a way to contact you if something mysterious or suspicious happens. But to be safe, make sure never give them to strangers!
